## ABOUT

### PROCESS ENGINEERING SYSTEMS

With strong and dynamic staff, M2 provides "Special Machinery Manufacturing" and "Assembly Machines" services for many sectors, especially the "Defense and Aviation" and "Automotive" sectors.

### FROM DESIGN TO INSTALLATION

M2 offers efficient solutions for the needs of companies in the field of "Industrial Machinery" with its "Automatic Feeding Systems" developed by itself, as well as special machinery manufacturing and assembly machinery services.

## CORE PROCESSES

### INDUSTRIAL MACHINES

M2, self-developed  
«Automatic Feeding  
Systems»  
in the field of  
«Industrial Machines»  
offers efficient  
solutions for the  
needs of companies.

### ASSEMBLY MACHINES

M2 provides  
"Assembly Machines"  
service for the  
"Defense and Aviation"  
and "Automotive"  
sectors with its strong  
and dynamic staff.

### PROJECT BASED MACHINES

M2 provides turnkey  
services for «Project  
Based Machines» to its  
customers with its  
solution-oriented,  
technical approaches.

## INDUSTRIAL MACHINES

### AUTOMATED SCREW FEEDING MACHINES

Developed and produced by M2, "Automatic Feeding Systems" is our industrial product that stands out with its compact structure, offering efficient and cost-effective solutions for many sectors in assembly lines.

Our product is a compact machine that can operate independently from all units with its internal PLC, 7 inch HMI Display, electrical and pneumatic panel.

# INDUSTRIAL MACHINES

## AUTOMATED SCREW FEEDING MACHINES

- Internal PLC and 7 inch HMI display
- Internal electrical and pneumatic panel
- Internal machine chassis and connection
- Independent operation with compact structure
- Serial and fast working module
- Detailed time and control option
- Circular and step module option
- Maintenance module

## ASSEMBLY MACHINES

### ASSEMBLY MACHINES AND LINES

M2 manufactures turnkey assembly machines and assembly lines for the companies it serves.

M2 manufactures assembly machines for its customers' production capacities in targeted quality and standards, and meets all system requirements, including the traceability infrastructure where operations are recorded.

# PROJECT BASED MACHINES

## TURNKEY PROJECT SERVICES

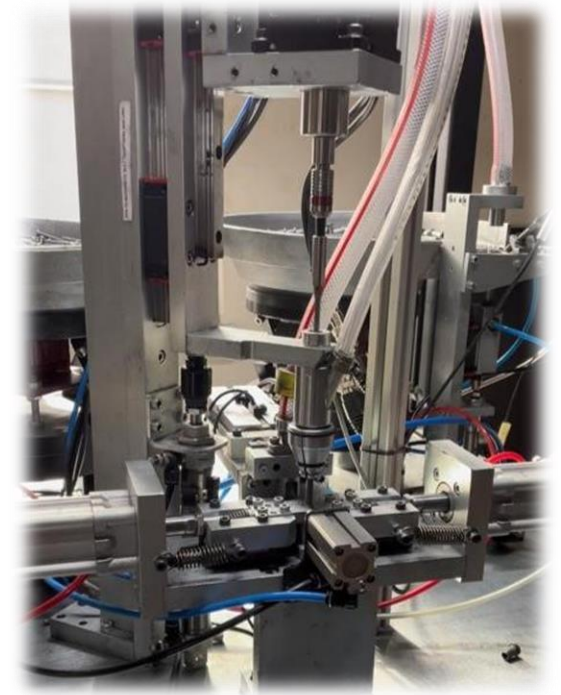

M2 manufactures turnkey special machinery for the companies it serves.

M2 is based on customer satisfaction by acting within the framework of the "Perfect Engineering Service" principle in all processes from design to commissioning, with its services that meet international standards compliance and specification requirements..

# APPLICATIONS

## AUTOMATED SCREW FEEDING MACHINES

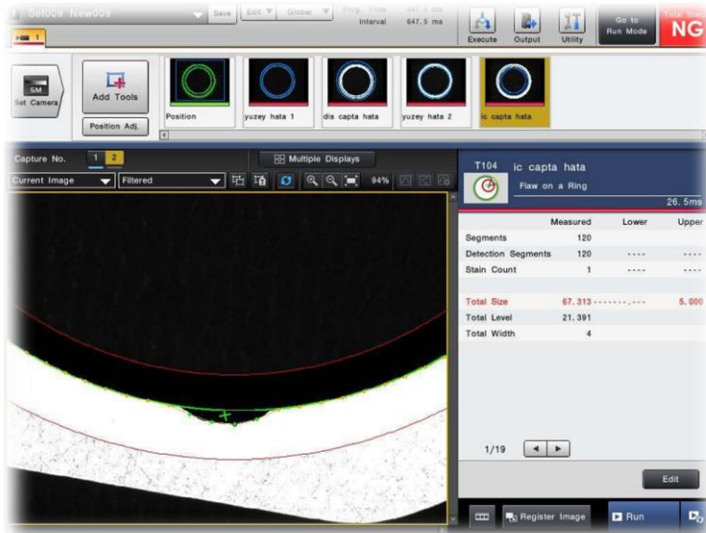

**INTERNAL PLC AND HMI SCREEN FEEDING SYSTEMS  
FEED TO ROBOT AND SCREW DRIVER**
